SUMMARY

Java Backend Developer with 1 year of experience building scalable backend systems with Spring Boot, REST APIs, Kafka, Redis, and MySQL. Built real-time APIs, event-driven alerts, and secure data models for Jatayu, an AI-powered disaster response drone platform at Syntara Tech. Experienced in caching, event-driven design, and Agile delivery.

PROFESSIONAL EXPERIENCE

Java Backend Developer | Syntara Tech Private Limited

June 2025 – June 2026

Chandigarh – Backend for Jatayu, an AI-powered disaster response drone platform

- Designed and developed **14+ RESTful APIs** using Spring Boot for mission management, sensor data ingestion, geo-tagged alerts, and dashboard services, achieving average response times **under 250 ms**.
- Built Kafka-based event pipelines for real-time victim-detection and hazard alerts, delivering sub-second updates to the central dashboard for **6+ concurrent field operator teams** without blocking core API throughput.
- Integrated Redis caching for high-frequency telemetry and live mission data, reducing average database read load by **~30%** and improving dashboard responsiveness during peak sensor ingestion.
- Implemented Spring Security with JWT authentication and role-based access control across **3 user roles** (field operator, command center, admin), reducing unauthorized access risk to sensitive mission data.
- Modeled relational data structures with Spring Data JPA and MySQL across **16 entities** for mission records, survivor locations, and sensor logs, applying indexing strategies that improved key query performance by **~25%**.
- Collaborated within a cross-functional engineering team of 8 using Agile practices (Jira, Sprint Planning, code reviews, Git feature-branch workflow) to deliver features through Dev → SIT → UAT → Production on schedule.

TECHNICAL PROJECTS

Digital E-Wallet Platform (Microservices Architecture) | GitHub

Dec 2025 – Present

Java | Spring Boot 3 | Apache Kafka | Redis | MySQL | Spring Security | Hibernate ORM, JPA

- Designed and built a distributed E-Wallet backend using a microservices architecture, enabling modular services for user onboarding, wallet management, and real-time transaction processing.
- Implemented inter-service communication using Spring Cloud OpenFeign for synchronous RESTful calls and Apache Kafka for asynchronous event-driven messaging, decoupling services and making each independently modifiable.
- Implemented Spring Security with JWT-based authentication and authorization, including token generation and validation, to secure REST APIs while maintaining clear service boundaries across microservices.

Event-Driven Movie Booking Platform | GitHub

Aug 2025 – Nov 2025

Java | Spring Boot | Spring Security | Apache Kafka | MySQL | Hibernate ORM, JPA

- Developed a Spring Boot backend for movie listings, show scheduling, and ticket booking, exposing REST APIs with relational data modeling via Spring Data JPA and MySQL.
- Implemented an event-driven notification pipeline using Apache Kafka to publish booking events and trigger email confirmations via JavaMail, ensuring the booking API is not blocked by email delivery.
- Designed a layered architecture (Controller-Service-Repository), entity relationship modeling, and role-based authentication and authorization via Spring Security to promote separation of concerns and enforce access control.

TECHNICAL SKILLS

Languages: Java (8, 11, 17)

Backend Frameworks: Spring Boot 3, Spring Core, Spring MVC, Spring Security, Spring Cloud (Eureka, OpenFeign)

Microservices & Architecture: Microservices, REST APIs, Event-Driven Architecture, OOP

Databases & Caching: MySQL, SQL, Spring Data JPA, Hibernate ORM, JPA, Spring JDBC (JdbcTemplate), Redis

Messaging: Apache Kafka (Producer/Consumer, Topic Management, Async Workflows)

Security: Spring Security, JWT, OAuth2, OpenID Connect, Authentication & Authorization

Testing: JUnit 5, Mockito (Unit Testing, Integration Testing)

Tools & DevOps: Git, GitHub, Maven, Docker, Postman, IntelliJ IDEA

EDUCATION

Amity University

Bachelor of Computer Applications (BCA); CGPA: 7.2

Noida, Uttar Pradesh

July 2021 – November 2024

Bal Bharati Public School

Senior Secondary Certificate (Class XII); Percentage: 76%

Noida, Uttar Pradesh

April 2016 – April 2017

CERTIFICATIONS

DSA in Java | Apna College (Feb 2025)

Java Backend Development Program | GeeksforGeeks (Nov 2025)
